RE: Romney Drum Site

Dear Ms. Wolper:

This letter confirms our conversations in which we agreed to the following steps in order to complete the removal action at the above referenced site.

1. The area already excavated will be scrapped down to bedrock and the loose dirt will be collected and put into an overpack drum.
2. The area will be covered with topsoil. Fertilizer, seed and mulch will be used to rehabilitate the area and return it to its natural state.
3. We will confirm the end of the fieldwork in writing within 7 days of its completion.
4. The drums on site will be shipped to TES early in Jan., 1990 per EPA Guidelines.

Assuming that you agree with the steps outlined in this letter, and unless we hear otherwise, we plan to complete the removal action by the end of next week.

Sincerely,

James W. Orr
Manager
